EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven E. Koffs (Reg. No. 37,163) on February 16, 2006.

The application has been amended as follows:

Claims 1 and 13, line 1, add --computer-implemented-- between A and method.

Allowable Subject Matter

2. Claims 1-18 have been allowed.

3. The following is an examiner's statement of reasons for allowance:

As to claims 1-7 and 13-18, patentability resides, at least in part, in the combination of: a computer-implemented method for generating a set of technology files pertaining to fabricating semiconductor devices, identifying a technology, creating a first set of virtual technology files pertaining to the first technology, identifying a second set of virtual technology files pertaining a second technology, wherein the second set linked to a predetermined set of actual files in a document repository, copying links of the second set to generate corresponding links for a first subset of virtual technology, approving the first set of the virtual technology files to make it effective for implementing the first technology, in further combination with the other limitations of the base claims.

As to claims 8-12, patentability resides in a component based semiconductor fabrication process information management system for the method of claims 1-7 and 13-18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirsch et al., Osheiski et al., Hsuing et al., and Pasadyn et al. disclose related art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jayprakash N. Gandhi whose telephone number is 571-272-3740. The examiner can normally be reached on 7:00 - 4:30 (Mon. - Fri.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo P. Picard can be reached on 571-272-3749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
